About Me

I'm an IT graduate always eager to learn and improve my skills in front-end web development methods. In the recent few years, I've done my best to learn different languages and frameworks like JavaScript, React.js, Next.js, and Tailwind CSS. And now, I see myself ready to climb up another step in my career ladder. I do believe that I would be a passionate, hardworking team player who always loves to challenge herself to progress more and more.

Education

MSc in Computer Engineering

Azad University, Iran
2016 – 2019

BSc in Information Technology

Azad University, Iran
2011 - 2015

Certificates

React Development

SheCodes React Workshops
Oct 2022
Valid Certificate ID: [81d3b33a6eada78ac3f0eaefc458b6a1](#)

Front End Development

SheCodes Plus Workshops
Sep 2022
Valid Certificate ID: [332b14f8c359c104e886ed823c5236be](#)

SheCodes Responsive Workshops
Sep 2022
Valid Certificate ID: [70fb5814c13a3470a198bf5fd94c6ccb](#)

Introduction to Coding

SheCodes Basic Workshops
Aug 2022
Valid Certificate ID: [67ea2334dcb2bdd38663d06395e03d18](#)

Work Experience

Professional Development

Career Break
Sep 2022 – Present

After coming to the UK the last September, I have been trying to stay connected with coding and keep myself updated. I got SheCodes responsive and react certificates, started to learn typescript, and improved my skills in coding. I have also done some sample projects available on my online portfolio.

Front-End Developer

Vira-Madar, Isfahan, Iran
July 2021 – Sep 2022
Skills: Working under pressure, Time management, Effective Communication, Incentive, self-discipline.

Working for Vira-Madar was my first job as a front-end developer, and it was a fantastic opportunity to work in a professional environment and learn how we can handle big projects as a team. I learnt a lot and improved my skills in working with Libraries, getting data from APIs, and code based on websites' design on Figma. I worked on many projects using React.js and Next.js. I learnt how to create effective, concise code while being able to keep up with tight deadlines and be adaptive with my responses to bugs and issues that arose.
