👤 About Me

With over two years of hands-on experience in JavaScript, React.js, and Tailwind CSS, I excel in efficient data fetching, state management, UI/UX implementation, and responsive interfaces. Adept at time management and effective communication, I thrive in fast-paced, team-oriented environments. With a master's in computer engineering and related certifications in front-end development, I'm committed to continuous learning and technical excellence.

💡 Key Skills

- *+2 years of experience utilizing JavaScript and React.js in Magneto and E-commerce projects.*
- *Many single page applications by React-Router-Dom latest version.*
- *Demonstrated expertise in fetching data from APIs (CRUD Operation).*
- *Employing Hooks such as Use Effect, Use State, Use Reducer, etc.*
- *Employing pivotal libraries including Redux and Redux Toolkit for effective state management.*
- *Interpreting UI/UX designs using Figma and seamlessly translating them into functional code.*
- *Creating user-friendly and responsive interfaces through the implementation of Tailwind CSS.*
- *Using GitHub repositories to foster organized and collaborative coding practices.*
- *Utilizing Node Package Management (NPM) for streamlined package installation and dependency management.*
- *In-depth knowledge of fundamental Testing, Debugging, and Troubleshooting procedures, using React Testing Libraries and Jest.*
- *Familiarity with database platforms such as MongoDB and Firebase.*
- *Familiarity with back-end technologies such as PHP and MySQL.*

🧰 Work Experience

Freelancer Developer
(Professional Development)
Sep 2022 – Present

After coming to the UK last September, I have been trying to stay connected with coding and keep myself updated. I participated in SheCodes workshops and improved my skills in coding. I have also done some sample projects as a freelancer developer mostly with React and Tailwind available on my online portfolio.

Front-End Developer
Vira-Madar, Isfahan, Iran
July 2021 – Sep 2022
Soft Skills: *Working under pressure, Time management, Effective Communication, teamwork, problem-solving*

Working for Vira-Madar was my first job as a front-end developer, and it was a fantastic opportunity to work in a professional environment and learn how we can handle big projects as a team. I learnt a lot and improved my skills in working with Libraries, fetching data from APIs, and coding based on websites' design on Figma. I worked on many projects using React.js and Next.js. I learnt how to create effective, concise code while being able to keep up with tight deadlines and be adaptive with my responses to bugs and issues that arose.

🎓 Education

MSc in Computer Engineering
Azad University, Iran **2016 – 2019**

BSc in Information Technology
Azad University, Iran **2011 - 2015**

📜 Certificates

React Development
SheCodes React Workshops **Oct 2022**
Valid Certificate ID: 81d3b33a6eada78ac3f0eaefc458b6a1

Front End Development
SheCodes Plus Workshops **Sep 2022**
Valid Certificate ID: 332b14f8c359c104e886ed823c5236be

Responsive Web Development
SheCodes Responsive Workshops **Sep 2022**
Valid Certificate ID: 70fb5814c13a3470a198bf5fd94c6ccb

Introduction to Coding
SheCodes Basic Workshops **Aug 2022**
Valid Certificate ID: 67ea2334dcb2bdd38663d06395e03d18
